JavaScript, Typescript
Node, Express, Nest
RestAPI, Postman, Swagger
PHP, Laravel

MySQL, Postgres, MongoDB, MarkLogic
EC2, S3, Lambda, Cloudwatch, API Gateway
Jest, Playwrite
Git, Gitlab, Github
Stripe, GIB
CI/CD, Jenkins
Python, Agentic AI

PROFESSIONAL EXPERIENCE

DENTSU GLOBAL SERVICES **Pune**
Technical Lead *Jan 2026–Present*

- Leading development and architecture of scalable web applications using Node.js and React, ensuring high performance and maintainability.
- Migrated legacy applications to modern MERN stack, improving system scalability, performance, and developer productivity.
- Driving adoption of Agentic AI solutions, integrating AI-powered automation and intelligent workflows into business applications.

LTIMINDTREE **Pune**
Product Engineering Specialist *May 2022–Dec 2025*

- Designed and developed innovative applications in the ESG and e-commerce domains, enhancing sustainability reporting and compliance solutions.
- Led a cross-functional team in delivering high-quality e-commerce platforms, improving user experience and increasing sales.
- Designed and implemented scalable applications using the MERN stack (MongoDB, Express.js, React, Node.js), with Nest and NextJs frameworks for optimizing performance and reducing load times.
- Collaborated with stakeholders to gather requirements and translate them into technical specifications.
- Mentored junior developers, fostering a culture of continuous learning and improvement within the team.

NEC SOFTWARE SOLUTIONS. **Mumbai**
Senior Software Engineer *Jun 2020–Apr 2022*

- Designed and developed scalable web applications leveraging PHP, Node.js, and AWS.
- Collaborated with multiple teams to deliver high-quality software solutions for a UK client, ensuring timely project delivery and adherence to client specifications.
- Actively contributed to code reviews, fostering best practices and maintaining high coding standards.
- Developed and executed unit tests to validate application functionality, significantly reducing the number of bugs in production and enhancing overall software reliability.
- Followed agile methodologies to manage project timelines and deliverables, facilitating daily stand-ups and sprint planning sessions to enhance team collaboration and transparency.

EVOLUTIONCO DIGITAL & INTERACTIVE CONSULTANCY PVT LTD **Mumbai**
PHP Developer *Mar 2019–Jun 2020*

- Led the development of a comprehensive DHL shipping project, starting from concept to implementation, resulting in a streamlined logistics solution that improved shipping efficiency.
- Collaborated with a cross-functional team to define project requirements, design architecture, and ensure alignment with client expectations throughout the development lifecycle.
- Designed and implemented core functionalities, including order processing, tracking, and reporting features using Angular and NodeJS.
- Established and maintained a robust testing strategy, incorporating unit testing and integration testing to ensure high-quality deliverables.
- Utilized Agile methodologies to manage project tasks, conduct sprint planning, and facilitate daily stand-ups, ensuring efficient communication and project progress tracking.
- Engaged with stakeholders regularly to present progress updates and gather feedback to ensuring that the project met business goals.

AQUIL SOFTWARES **Nashik**
Software Developer *Jun 2015–Feb 2019*

- Developed and maintained web and mobile applications using a diverse set of technologies, including PHP, JavaScript, and Android, delivering innovative solutions that met client needs.
- Collaborated closely with clients to gather requirements and provide technical insights.
- Played a key role in the software development lifecycle, from initial concept and design to deployment and maintenance, resulting in high client satisfaction and repeat business.
- Conducted code reviews and provided mentorship to junior developers, promoting best practices in coding, testing, and project management.
- Troubleshot and resolved issues in a timely manner, ensuring minimal disruption to client operations and maintaining project timelines.

KEY PROJECTS

Lucid Motors | Full-Stack Engineer | Sep 2023 – Dec 2025

- Lucid Motors is the US based car manufacturing company. This application allows customer to customize and book the car.
- **Tech Stack** - ReactJs, Node (Nest), TypeScript, MongoDB, AWS,Microfrontend, Jest
- **URL -** https://lucidmotors.com

Climanomics – S&P Global | Full-Stack Engineer | Aug 2022 – Aug 2023

- Climanomics is a web application that provides climate risk analytics and insights for financial markets. It helps users understand the impact of climate change on investments and portfolios.
- **Tech Stack** - ReactJs, Node, TypeScript, MongoDB, PostgreSQL, AWS, Jest
- **URL -** https://www.spglobal.com/esg/solutions/climanomics

Emerald Insight | Full-Stack Engineer | Jun 2020 – Apr 2022

- Emerald is the global publisher where user can subscribe the contents like academic journals, books, case studies, etc.
- **Tech Stack** - Node, PHP, MongoDB, PostgreSQL, Java, AWS, Jest
- **URL -** https://www.emerald.com/insight

EDUCATION

SAVITRIBAI PHULE PUNE UNIVERSITY **Nashik**
Master of Computer Application *Jul 2012–May 2015*
